MSc Management Information Systems
Delivered at University of Ghana Business School

A research-informed and practice-oriented Masters programme in information systems and management delivered in Accra, Ghana, in collaboration with University of Ghana Business School, one of the best business schools in Africa.

About the programme
The programme offers an excellent opportunity for students in Africa to enjoy high standard British postgraduate-level education on their door step. The modules are delivered by staff from Henley Business School, supported by staff from the University of Ghana Business School. The programme prepares students for the fast growing profession of information management.

What it gives you?
You would enjoy expertise from both institutions in the area of information systems and management. Similar programmes run in Reading, UK and China. Students have the opportunity to complete part of the programme in these locations (additional fees may apply).

Who is this programme for?
We welcome applicants from recent university graduates as well as experienced professionals. Classes are taught in the evening and at weekends (in blocks) to support attendance of working professionals.

Programme content
Compulsory modules:

- **Applied Informatics**
  - Understand the underpinning theory and methodology to information systems
  - Identify the user requirements and suitable IT systems solutions
  - Perform analysis and design of a systems solution using appropriate technology

- **Research Methods**
  - Prepare a research proposal for a dissertation project through an exploration of research methods, data collection and analysis, ethical and political issues

- **Business Domain and Requirement Analysis**
  - Articulate information systems solutions for the business based on business practices and management at operational and strategic level
  - Examine the role of information systems in achieving corporate objectives, supporting operations, and managing business intelligence and knowledge

- **Organisational Design and Performance Management**
  - Recognise and assess critically the organisational models to ensure those organisational elements are rightly integrated for adding value to the business
  - Design an effective organisation within its market niche and review its business performance for sustainability

- **Dissertation**
  - Conduct research and apply knowledge into practice through an independent project

Optional Modules may include two of the following: Business Intelligence and Data Mining, Systems Analysis and Design, IT Project Management, Enterprise Systems and Business Communication & Negotiations
